## PROJECTS

---

Rest API    <https://github.com/Omar1030/REST-API>

- Developed a scalable REST API using Node.js, Express, and MongoDB (Mongoose) following the MVC architecture for clean structure and maintainability.
- Implemented JWT authentication with access tokens, refresh tokens, and refresh-token rotation to enhance security and prevent token reuse attacks.
- Supported multi-device login, allowing users to stay authenticated across different devices with separate token tracking.
- Added role-based authorization to control access to protected routes and system privileges.
- Implemented validation using tools like Express-Validator to ensure data integrity and prevent malformed inputs.
- Added email functionality using Nodemailer, supporting password reset.

React E-commerce   <https://github.com/Omar1030/SHOP.CO>

- Built a modern, responsive E-commerce web application using React, Redux, Tailwind CSS, and JavaScript.
- Implemented functional components and React Hooks with a clean, modular architecture.
- Used Redux / Context API for efficient and centralized state management.
- Applied code splitting to optimize performance and reduce initial load time.
- Ensured full responsiveness across devices using Tailwind's utility-based styling.
- Followed best practices for component structure, file organization, and performance optimization.

Portfolio   <https://github.com/Omar1030/Fokir>

- Developed a portfolio website using HTML, CSS, Bootstrap, and vanilla JavaScript.
- Used Bootstrap to build a mobile-first, responsive layout compatible with all devices.
